                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 238, Application US/08781986A

Patent No. 6737248
GENERAL INFORMATION:
APPLICANT: Charles Kunsch
TITLE OF INVENTION: Staphylococcus aureus Polynucleotides and Sequences
NUMBER OF SEQUENCES: 5255
CORRESPONDENCE ADDRESS:
ADDRESSE: Human Genome Sciences, Inc.
STREET: 9410 Key West Avenue
CITY: Rockville
STATE: Maryland
CCUNTRY: USA

Sequence 383, Application US/08781986A

Sequence 383, Application US/08781986A

Patent No. 6737248

GENERAL INFORMATION:
APPLICANT: Charles Kunsch

TITLE OF INVENTION: Staphylococcus aureus Polynucleotides and Sequences
NUMBER OF SEQUENCES: 5255

CORRESPONDENCE ADDRESS:
ADDRESSEB: Human Genome Sciences, Inc.
STREET: 9410 Key West Avenue
CITY: Rockville
STRATE: Maryland
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    7 GAATCAGTGAGAGGTTTAAAAATTTTAAGTGTAATTGGCTTATTGTTTTGTTTTAATTGCA 66
